

Carbon Reduction Plan – IntaForensics Ltd.

Supplier name: IntaForensics Ltd.

Publication date: 16 January 2024

Commitment to achieving Net Zero

IntaForensics Ltd. is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations:	
2021 is the second-year carbon emissions have been measured for IntaForensics. Measurements were completed in 2020 however due to the COVID-19 pandemic, carbon emissions were not reflective of normal business practices and were not considered to be a true representation of company activities.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	23.3
Scope 2	138.5
Scope 3 (Included Sources)	0.1
Total Emissions	161.9 tonnes CO₂e

Current Emissions Reporting

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	28.6
Scope 2	62.3
Scope 3	2.2
Total Emissions	93.1 tonnes CO₂e

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	24.9
Scope 2	50
Scope 3	0.4
Total Emissions	75.3 tonnes CO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

The aim is a reduction of approximately 5.6 tCO₂e per year.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline:

- ISO 14001 certification
- The digital forensic laboratory will go through an in-depth programme of equipment replacement to operate on the most energy efficient infrastructure including imaging, processing and analysis workstations. One example is where our current ten imaging machines will be reduced to six imaging stations by using more powerful and energy efficient models.
- Utilisation of online interviews as a key stage of the recruitment process to reduce the environmental impact of inviting multiple candidates in for a stage one recruitment interview

In the future we hope to implement further measures such as:

- Electrifying the company fleet of vehicles
- On-going project to assess the feasibility of adopting a cloud-based solution for technical operations there by reducing the number of physical machines in the building and reducing the company's electricity consumption

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting¹⁴. Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions has been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard¹⁵.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Carl Osborne – Business Unit Director Date: 22/01/2024
