Carbon Reduction Plan

Supplier Name: IntaForensics Ltd

Publication Date: 9th June 2025

Commitment to achieving Net Zero

IntaForensics Ltd. is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021										
Additional Details relating to the Baseline Emissions calculations:										
2021 is the second-year carbon emissions have been measured for IntaForensics. Measurements were completed in 2020 however due to the COVID-19 pandemic, carbon emissions were not reflective of normal business practices and were not considered to be a true representation of company activities.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

The aim is a reduction of approximately 5.6 tCO₂e per year.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline:

- ISO 14001 certification
- The digital forensic laboratory will go through an in-depth programme of equipment replacement to operate on the most energy efficient infrastructure including imaging, processing and analysis workstations. One example is where our current ten imaging machines will be reduced to six imaging stations by using more powerful and energy efficient models.
- Utilisation of online interviews as a key stage of the recruitment process to reduce the environmental impact of inviting multiple candidates in for a stage one recruitment interview
- Paperless deliveries and collection scheme
- Staff EV scheme

In the future we hope to implement further measures such as:

- Cycle to Work scheme
- Cell Site surveying tool (Enhancell) has remote access, which will reduce travel time for the team.
